Surgical Innovations Group plc

(the "Company")

CE Certification for YelloPort Elite®

Surgical Innovations Group plc (AIM: SUN), the designer and manufacturer of innovative medical technology for minimally invasive surgery, announces that its new laparoscopic port access system, YelloPort Elite®, has attained CE certification.

Designed to address the continuing need for high quality cost effective solutions within laparoscopic surgery, YelloPort Elite® utilises Resposable® technology to meet these clinical needs.

The key advantage of the YelloPort Elite® is its Universal Seal, which allows for seamless introduction of 5mm to 12mm instruments during the surgical procedure.

Clinical evaluations have produced excellent results and the Company is delighted with the feedback from both surgeons and hospital personnel.

Melanie Ross, Group FD & MD of Surgical Innovations Limited, commented: *"We are extremely pleased to have attained CE certification for our YelloPort Elite® range which strengthens our portfolio. The certification means that we have a next generation port access system, which we believe will make a difference to surgeons and we look forward to launching the product in the UK within the coming month, before branching out into Europe shortly afterwards."*
