

Surgical Innovations (SI) is pleased to announce it will be exhibiting our surgeon-led solutions for laparoscopic surgery at the American College of Surgeons (ACS) exhibition from September 30-October 4, 2012 in Chicago, IL.

SI intends to engage with the US surgeons present about the benefits of our Resposable™ medical devices – which combine reusable and disposable components – including how this technology can address the cost concerns of US hospitals without compromising on quality.

The exhibition follows on from SI's success at US based conference SAGES (Society of American Gastrointestinal and Endoscopic Surgeons) last year where we made a big impact on the US market with our pioneering technologies including PretzelFlex – the world's first pretzel shaped organ and tissue retractor for minimally invasive surgery.

The 2012 clinical congress marks the 100th anniversary of the founding of the American College of Surgeons which is focused on advancement of surgical knowledge and increased interaction amongst the surgical community.
