

Alasdair Mercer, Project Manager, has been featured as 'Employee of the Month' in January's edition of the Manufacturer Magazine.

This is in recognition of all of Alasdair's hard work at Surgical Innovations, most recently with the success of the PretzelFlex™ project. Alasdair led 'Team Flex' who developed the pioneering new product PretzelFlex™ - the world's first reusable pretzel shaped organ and tissue retractor for use in minimally invasive surgery. The shape gives it strength and stability. The product was launched in November 2011.

The success of the project is thanks to Alasdair and Team Flex together with the tireless efforts of the manufacturing and assembly teams who ensured that the project was completed on time. Congratulations Alasdair and well done to everyone who helped to make the project a success! Check out the article on the link below or in January's edition of the Manufacturer Magazine:
