

Surgical Innovations Group plc (AIM: SUN), the designer and manufacturer of creative solutions for Minimally Invasive Surgery (MIS), key regional Master Distributor, Asia Cardiovascular Products Ltd and local distributor DKSH Thailand came together to provide a powerful show of strength as they jointly exhibited at the 38th Annual Scientific Congress of the Royal College of Surgeons of Thailand, this year appropriately titled: "Surgical Innovation in Asia".

With the focus of the event being on surgical innovation, it is no surprise that SI's Resposable® concept, which combines the advantages of disposable and reusable components of the devices, was especially popular amongst the attending surgeons. The innovative concept can reduce the cost of the instruments by up to two thirds, yet does not compromise the quality. One of the 2,000 visitors commented: "This concept is very suitable for Thailand. The Resposable® idea would benefit the patients and save hospitals cost."

DKSH Thailand ably supported by ACP, with their regional presence and dedicated team of specialists in MIS, will be able to build on the success of the congress and develop a long term implementation strategy for SI's innovative Resposable® range of MIS devices.
