

Surgical Innovations (SI) attended the World Association of Laparoscopic Surgeons congress to support our master distributor ACP. The congress was held in New Delhi, India - one of the fastest growing laparoscopic markets in the world.

This was the perfect opportunity for SI to make a mark on the Indian market with our Resposable™ YelloPort+plus™ port access system and Logi™Range instrumentation. The products generated interest from the international surgeon attendees - offering a cost effective yet quality solution for minimally invasive ('keyhole') surgery.

The congress was a great success and SI looks forward to supporting ACP and their Indian distributor in their forthcoming promotion of SI products in the region
