

On Thursday 29th March Surgical Innovations (SI) is hosting the first Leeds International Business Club meeting at our Leeds site.

The meeting will focus on export and will be attended by a selection of Yorkshire-based companies from a wide variety of sectors to share information, knowledge and experiences.

Graham Bowland, Chief Executive Officer (CEO) of SI and member of the Leeds city region (LCR) BIG (Business, Innovation and Growth) Panel, is keen to promote closer collaboration between companies in the region. As such SI is delighted to host the inaugural meeting of the club.

SI believes this and future Leeds International Business Club meetings will add value to all companies involved.
